Job title : Data Science Intern Immediate
Opening: Data Science Intern
Location: Pune
Job Type: Full-Time Internship

About AssetCues :

AssetCues is a fast-growing B2B SaaS company focused on transforming how mid-market and enterprise customers manage their fixed assets. Through AI-driven automation, mobile technology, and real-time asset tracking, we enable organizations to streamline physical verification, maintain accurate asset registers, and ensure compliance and control across the asset lifecycle.

Role Overview :

We are looking for a motivated Data Science Intern to support data analysis, database optimization, performance analysis, and research activities. The intern will work with real-world datasets, analytical databases such as ClickHouse, and data-driven solutions while gaining practical exposure to data science and backend systems.

Key Responsibilities :

- *Collect, clean, transform, and analyze data from different sources.*
- *Perform exploratory data analysis (EDA) to identify trends, patterns, anomalies, and data-quality issues.*
- *Write and optimize SQL queries for data extraction, analysis, and reporting.*
- *Work with ClickHouse for analytical queries and high-volume data analysis.*
- *Assist in database optimization and performance tuning by identifying slow queries and bottlenecks.*
- *Analyze query execution plans and support optimization through appropriate indexing and query improvements.*
- *Prepare data summaries, reports, dashboards, and insights to support business and technical decisions.*
- *Research new tools, technologies, algorithms, and approaches for upcoming development initiatives.*
- *Support proof-of-concepts (POCs) and research activities for new data science and analytics solutions.*
- *Collaborate with developers and technical teams to understand data requirements and implement data-driven solutions.*
- *Investigate data and performance-related issues and assist with root-cause analysis.*
- *Document analysis, research findings, optimization results, and recommendations.*

Required Skills :

- *Basic knowledge of Python and data science concepts.*
- *Good understanding of SQL and relational databases.*
- *Basic knowledge of data analysis and data visualization.*
- *Understanding of Pandas, NumPy, and basic data-processing techniques.*
- *Basic understanding of statistics and analytical concepts.*
- *Interest in working with ClickHouse or other analytical databases.*
- *Basic understanding of database optimization and performance tuning.*
- *Strong analytical and problem-solving skills.*
- *Willingness to research and learn new technologies.*
- *Good communication and teamwork skills.*

Preferred Qualifications :

- *Pursuing a degree in Computer Science, Data Science, Information Technology, Mathematics, Statistics, or a related field.*
- *Academic or personal projects involving Python, SQL, data analysis, or machine learning.*
- *Exposure to Jupyter Notebook, Power BI, Tableau, or similar analytical tools.*
- *Exposure to PostgreSQL, MySQL, ClickHouse, or other databases.*
- *Interest in machine learning, predictive analytics, or data engineering.*

Key Focus Areas :

- *Data Analysis*
- *Python*
- *SQL*
- *ClickHouse*
- *Database Optimization*
- *Performance Tuning*
- *Exploratory Data Analysis*
- *Research & POCs*
- *Data Visualization*
- *Machine Learning Fundamentals*
