Experience: Fresher
Employment Type: Full-Time with 2 months training program
Job Location: Baner, Pune
Stipend during training: 25,000 Rs
CTC after Training: 4,00,000 Rs
Work Mode: Work from Office
Department: IT

About the Role

IntelliSource Technologies Pvt. Ltd. is looking for a motivated, analytical, and detail-oriented **Business Analyst – Trainee** to join our software development team.

This is an entry-level opportunity for fresh graduates who want to build a career in business analysis within the IT and software industry. The selected candidate will receive practical exposure to real-world software projects and work closely with business analysts, product owners, developers, quality assurance analysts, and other stakeholders.

The role involves understanding business requirements, analyzing application workflows, preparing documentation, supporting requirement clarification, participating in software testing and UAT activities, and helping ensure that software solutions meet business and user needs.

Key Responsibilities

- Understand business requirements, user needs, and application workflows.
- Assist in gathering and analyzing requirements from stakeholders and internal teams.
- Participate in requirement discussions and clarification meetings.
- Convert business requirements into clear and structured functional requirements.
- Create user stories and acceptance criteria based on approved business requirements.
- Create process flows, workflow diagrams, and wireframes when required.
- Work closely with developers and QA analysts to explain and clarify requirements.
- Identify requirement gaps, missing scenarios, and potential business risks.
- Maintain requirement documents, user stories, meeting notes, and other project documentation.
- Participate in sprint planning, daily stand-ups, backlog refinement, sprint reviews, and other Agile ceremonies.

Required Skills

- Basic understanding of business analysis concepts.
- Ability to understand and analyze business requirements.
- Strong analytical and logical thinking skills.
- Ability to understand software application workflows.
- Good problem-solving and decision-making abilities.
- Strong written and verbal communication skills.
- Good documentation and presentation skills.
- Ability to explain requirements clearly to technical and non-technical team members.
- Strong attention to detail.
- Ability to identify missing scenarios and requirement gaps.
- Basic understanding of the Software Development Life Cycle (SDLC).
- Ability to work collaboratively in a team environment.

Good to Have

- Basic understanding of Agile and Scrum methodologies.
- Familiarity with user stories and acceptance criteria.
- Basic knowledge of Azure DevOps, Jira, or similar project-management tools.
- Understanding of software testing concepts.
- Familiarity with tools such as Microsoft Visio, Figma, Moqups, Miro or similar diagramming and wireframing tools.
- Good knowledge of Microsoft Excel, Word, and PowerPoint.
- Exposure to web or mobile application projects.
- Basic understanding of UI/UX concepts.
- Awareness of AI tools for research, documentation, analysis, and productivity.

Educational Qualification

- B.E. / B.Tech in Computer Science, Information Technology, or a related field.
- Any graduate or postgraduate candidate with strong analytical, communication, and technical aptitude may apply.

Candidate Profile

We are looking for candidates who:

- Have a genuine interest in business analysis and software applications.
- Enjoy understanding how businesses and software systems work.
- Are curious and comfortable asking relevant questions.
- Can understand complex information and explain it clearly.
- Have strong analytical and problem-solving abilities.

- Have good written and verbal communication skills.
- Pay close attention to details and documentation accuracy.
- Can think from both a business and end-user perspective.
- Are comfortable communicating with technical and non-technical team members.
- Are willing to learn new business domains and application workflows.
- Can accept feedback and continuously improve.
- Follow a disciplined approach to documentation and process compliance.
- Take ownership of assigned tasks and complete them within agreed timelines.

Why Join IntelliSource Technologies?

- Opportunity to work on real-world software applications and business requirements.
- Practical exposure to complete software development and business analysis processes.
- Hands-on experience working with development, QA, product, and business teams.
- Mentorship and guidance from experienced professionals.
- Opportunity to understand different business domains and complex application workflows.
- Structured career growth based on performance and skill development.
- Collaborative and professional work environment.
