mediamint

Junior Python Engineer – AI Team

Location: India

What to expect at MediaMint?

We love people who define their surroundings and who are constantly looking to learn new things. We value honesty and integrity above all. We love people who are honest, self-aware and intent on bettering themselves each day. If you love growth - professional and personal, then MediaMint is most likely the place for you!

What do we do?

MediaMint is an AI-powered Revenue Operations services company dedicated to accelerating innovation and revenue growth for platforms and publishers worldwide. Our mission is to enhance operational efficiency, scalability, customer satisfaction, and data-driven insights through advanced technology, automation, and AI capabilities. We serve industry leaders across AdTech, Consumer, CTV, Publishing, and Retail.

Job Description:

Are you passionate about Python and eager to apply your skills to challenging, real-world AI problems? We're looking for a bright and motivated Junior Python Engineer to join our core AI Transformation team. This isn't just a coding job; it's a chance to learn from experienced engineers and data scientists while contributing directly to projects that are strategically vital to MediaMint's future.

You'll be part of the team developing AI accelerators (using Python, LLMs, ML) to boost efficiency and working on components that will underpin our future Agentic RevOps Platform. This is your chance to get hands-on experience in a fast-paced environment where AI is moving from concept to production.

What You'll Do:

- **Develop & Maintain Python Code:** Write clean, efficient, and testable Python code for AI/ML applications, automation scripts, and data processing pipelines under the guidance of senior engineers.
- **Support AI Initiatives:** Assist in the development, testing, and deployment of AI accelerators and components for our AI-driven platforms.
- **Collaborate & Learn:** Work closely with senior engineers, data scientists, and product managers, actively participating in code reviews, design discussions, and knowledge-sharing sessions.
- **Troubleshoot & Debug:** Help identify and resolve issues in existing Python applications and AI/ML workflows.
- **Data Handling:** Write scripts to process, clean, and prepare data for use in ML models and operational workflows.
- **Contribute to Best Practices:** Learn and apply software development best practices, including version control (Git), testing frameworks, and documentation.

What You MUST Bring:

- **Solid Python Foundation:** Strong understanding of Python programming concepts, data structures, and standard libraries. (Demonstrable via projects, coursework, or initial work experience).
- **Eagerness to Learn AI/ML:** A genuine interest in artificial intelligence, machine learning, and data science concepts. You don't need to be an expert yet, but you must be hungry to learn.
- **Problem-Solving Aptitude:** Ability to break down problems, think logically, and contribute to finding solutions.
- **Collaborative Spirit:** Good communication skills and a desire to work effectively as part of a team.

- **Educational Background:** Bachelor's degree in Computer Science, Engineering, or a related field, OR equivalent practical experience demonstrating strong programming fundamentals.
- **Proactive Attitude:** Willingness to ask questions, seek feedback, and take initiative in your learning and development.

Bonus Points If You Have:

- Exposure to AI/ML libraries (e.g., Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch).
- Familiarity with APIs and web services.
- Basic understanding of databases (SQL or NoSQL).
- Experience with cloud platforms (like Google Cloud Platform - GCP).
- Experience with version control systems like Git.
- Contributions to open-source projects or personal coding projects.

Why MediaMint?

- **Learn from the Best:** Gain invaluable experience working alongside senior AI/ML engineers and data scientists on high-impact projects.
- **Real-World AI:** Move beyond theory and apply your Python skills to build tangible AI solutions used by major global brands.
- **Career Growth:** Excellent opportunity for professional development in the rapidly growing field of AI and MLOps within a supportive environment.
- **Cutting-Edge Tech:** Get exposure to LLMs, ML forecasting, cloud platforms, and modern software development practices.
- **Transformative Journey:** Be part of a company making a significant strategic shift towards AI leadership.
- **Global Team:** Collaborate with colleagues across the US, India, Europe, and Africa.

If you're a budding Python developer excited by AI and looking for a launchpad for your career, this is the role for you.

About MediaMint

MediaMint is a global professional services firm specializing in digital marketing and consulting. We work with a broad spectrum of clients - from Fortune 500 to start-ups. Our mission is to provide strategic, operational and technical support that drives performance and delivers outstanding results for our clients. Our vision is to be the transformative operating partner for media and technology companies worldwide. We currently have 4 offices. Our headquarters is in Hyderabad and it is our main delivery and operations center. Our other offices are in San Francisco, New York, Krakow (Poland) and Ilorin(Nigeria). MediaMint currently employs more than 2000+ dedicated professionals.
