Job Description – Backend Development Intern (Java & Spring Boot)

About the Role

We are looking for a passionate Backend Development Intern to join our engineering team at NxtPe. As a Backend Intern, you will work on designing, developing, and maintaining scalable backend services for real-world applications. You'll collaborate closely with experienced engineers and gain hands-on experience building production-ready systems.

Responsibilities

- Develop and maintain backend applications using Java and Spring Boot.
- Design and build RESTful APIs.
- Write clean, maintainable, and efficient code following best practices.
- Integrate databases and third-party services.
- Debug, troubleshoot, and optimize application performance.
- Participate in code reviews and team discussions.
- Collaborate with frontend developers, QA engineers, and product teams.
- Learn and contribute to cloud-native and microservices-based applications.

Required Skills

- Good knowledge of Java and Object-Oriented Programming (OOP).
- Understanding of Spring Boot, Spring MVC, and REST APIs.
- Familiarity with SQL databases such as MySQL or PostgreSQL.
- Basic knowledge of Git and version control.
- Understanding of data structures and algorithms.
- Strong analytical and problem-solving skills.
- Good communication and teamwork.

Eligibility

- Engineering students entering their **7th semester**.
- Students from **Tier 1 or Tier 2** colleges/universities.
- **Minimum academic score of 75% (or equivalent CGPA).**
- Prior internship experience is mandatory.
- Available for a full-time remote internship.
- Strong willingness to learn and grow in a fast-paced startup environment.

What We Offer

- Paid full-time internship.
- 100% remote work.
- Mentorship from experienced engineers.
- Opportunity to work on production-grade products.
- High-performing interns may be considered for a full-time role based on performance.
