Data Analyst Intern — AI Lighthouse Pricing

AMEA Data & AI — Commercial IT | | Location: India Pune (Hybrid)

Role Type	Fixed-Term (Intern)
Team	AMEA Data & AI — Commercial IT
Reports To	Head of Data & AI, AMEA
Start Date	January 2027
Duration	6 months (renewable)
Location	India (Hybrid)
Primary Project	AI Lighthouse Pricing

About the Role

Working alongside the Data Scientist on the AI Lighthouse Pricing project, this Data Analyst role is responsible for data sourcing, quality management, validation, and insight delivery. The analyst acts as the bridge between raw commercial and pricing data in SAP/Databricks and the model inputs required by the Data Scientist. This role also owns the commercial reporting layer — ensuring pricing KPIs and model outputs are visible to market teams in Qlik.

Key Responsibilities

- Source, clean, and validate pricing, volume, and market data from SAP S/4HANA and Databricks
- Build and maintain data pipelines for pricing analytics — ensuring timeliness and accuracy
- Create and maintain Qlik Sense dashboards for pricing performance tracking across AMEA markets
- Perform exploratory data analysis to surface pricing anomalies, gaps, or opportunities
- Collaborate with the Data Scientist to define and compute pricing features for ML models
- Manage data dictionaries, lineage documentation, and data quality scorecards
- Perform cost benefit analysis and sourcing of data from unstructured/structured sources
- Coordinate with country commercial teams to gather localised pricing inputs and validate outputs
- Produce weekly/monthly pricing performance reports for AMEA commercial leadership

Required Skills & Experience

- Strong SQL skills — querying complex relational datasets
- Experience with Qlik Sense or Power BI for dashboard development
- Familiarity with SAP data structures (SD, CO-PA, or pricing tables) is preferred
- Good understanding of pricing concepts — list price, discount structures, net realised price
- Attention to detail and rigour in data validation
- Ability to communicate data findings clearly to commercial stakeholders

Syngenta Technology Stack (Expected Proficiency)

- Databricks SQL — data querying and pipeline development
- Qlik Sense — primary reporting and dashboard tool
- SAP S/4HANA — source system for pricing and commercial data
- Azure Data Factory — data ingestion pipelines
- Excel / Power Query — ad-hoc analysis and data validation
- Microsoft Teams + SharePoint — collaboration
- Lynx AI — internal AI assistant for productivity

Nice to Have

- Experience in agri-input or FMCG pricing analytics
- Exposure to Python (pandas) for lightweight data transformation
- Understanding of commercial planning cycles in multinational companies

What We Offer

- Direct interaction with AMEA country teams and commercial leadership
- Develop skills across Databricks, SAP, and Qlik within a mature data platform
- Mentorship from Data & AI leadership
- Hybrid working
