The Hartford – Software Engineer (Intern + Full-Time)

About the Role

The Hartford is looking for passionate Software Engineer interns who enjoy solving complex technical problems and building high-quality software solutions. During the internship, candidates will work with experienced engineers on enterprise-scale applications, gain exposure to software development best practices, and contribute to real business projects. Successful interns may receive a full-time offer based on performance.

Key Responsibilities

- Design, develop, test, and maintain reliable software applications.
- Implement efficient algorithms and data structures to solve business problems.
- Write clean, reusable, and well-documented code using Python or Java.
- Debug applications, fix defects, and optimize application performance.
- Collaborate with product managers, QA engineers, and fellow developers.
- Participate in code reviews and follow software engineering best practices.
- Work with version control systems such as Git and contribute through Agile development processes.
- Continuously learn new technologies and contribute innovative ideas.

Eligibility & Skills

• Strong understanding of Data Structures and Algorithms.
• Proficiency in Python or Java.
• Good knowledge of Object-Oriented Programming concepts.
• Basic understanding of databases, SQL, and operating systems.
• Excellent analytical, communication, and teamwork skills.
• Ability to learn quickly and adapt to new technologies.

Compensation

Placement Type: Intern + Full-Time
Internship Duration: 6 Months
Internship Stipend: ₹1,00,000 per month
Expected Full-Time CTC: Approximately ₹20 LPA
