Data Engineer - Intern (2027 Batch)

Location: Chennai or Pune (Work From Office)

About V4C.ai

V4C.ai is a premier IT services consultancy specializing in Databricks to help organizations unlock the full potential of their data. We partner with enterprises to accelerate their journey to becoming data-driven by delivering end-to-end Databricks services across Lakehouse implementation, data engineering, AI/ML, and governance. Our expertise in integration, optimization, and enablement empowers clients to unify disparate data sources, modernize analytics, and build AI-ready platforms. By aligning Databricks capabilities with strategic business goals, we help organizations achieve faster insights, stronger competitive advantage, and scalable innovation.

Role Overview

We're hiring Data Engineer Interns for our Data Engineering team. This role begins with 3 months of structured, hands-on training at our office, followed by project-based training where interns are deployed onto live projects under mentorship. Candidates will continue as interns until they complete their degree, at which point they become eligible for conversion to a full-time role based on their performance.

Location: This is a work-from-office role based in Chennai or Pune. Candidates unable to work from the office should not apply.

What We're Looking For

- Strong knowledge of Python and SQL
- Basic understanding of data pipelines and ML concepts
- Good problem-solving and logical thinking
- Strong communication and teamwork skills
- Eagerness to learn Databricks and cloud data tools

Eligibility

- 2027 graduates (currently pursuing) in Computer Science, Engineering, Statistics, or related fields
- Internship or academic project experience in data engineering is a plus
- Must be available to work from the office for the duration of the internship, until degree completion

What You'll Gain

- Live exposure to cloud-based data and AI projects
- Mentorship from industry practitioners
- Path to Databricks certification
- Structured internship-to-full-time pathway upon degree completion
